## PREFACE.

---

THE 'Choir' was undertaken under the full conviction, (the result of experience and observation) that a style of music was much needed for singing schools, singing societies and choirs, more simple, natural and easy of execution; and more flowing, melodious and tasteful in its character, than much of that which is contained in the collections of psalmody now in use.

It is to be hoped, indeed, that no music will supersede such admirable old tunes as London, Old Hundred, St. Ann's and others whose solemn and majestic strains have so long animated the devotions of the house of God. For the expression of grandeur, majesty and sublimity, such tunes, if sustained with sufficient power, are unrivalled. It is exceedingly difficult, however, without the aid of an organ, to perform music composed of long and sustained notes, so as to bring out their full effect. Hence we often find a reluctance in a choir to attempt them; while, on the other hand, they are always pleased with, and it is comparatively easy for them to execute, such tunes as move somewhat quicker and in less equal notes. Nor is it to be denied that there are many emotions expressed in the Psalms and Hymns in common use, requiring a more brilliant and animated style. We would not advocate the introduction of any music into public worship that approaches to levity, or that is profaned by unhallowed associations; but we see no reason why we should be obliged to express all the various emotions to which piety gives birth, in a slow and monotonous style. Why should not the whole resources of the art, restricted indeed by the laws of taste and propriety, be enlisted in the service of the sanctuary? And may not this be done, and yet religious affections and not a mere taste for music be consulted?

Much of the new music contained in this work has been procured from European authors, and a number of tunes have been written expressly for the Choir and furnished in manuscript by English and German composers. Many subjects, it will be seen, have been selected from the works of Haydn, Mozart and others. These have, almost without exception, been arranged expressly for the Choir, and are now for the first time published. They will add much to the variety of tasteful and elegant psalm and hymn tunes; and it is believed they cannot fail of gratifying the lovers of sacred song.

A large number of tunes will be found in triple measure, in the manner of Cabot and Cadiz, p. 27, and Hebron, p. 28. Tunes in this time have been found so easy of execution, effective and universally popular, that it is believed the very large addition to their number here furnished, will be acceptable and useful. It may be desirable, however, sometimes to perform tunes written in this kind of measure, in equal notes; and vice versa. A very little practice will enable a choir to make such changes. They must not be attempted, however, except with those tunes whose rhythmical construction is perfectly regular throughout, as Hebron, p. 28, Lindon, p. 53, Anson, p. 53, &c.

It has been the constant aim of the Editor to arrange the harmony in the most easy and natural manner. He is fully convinced, after a careful consideration of the subject, that music designed for schools, and especially for religious worship, should be composed in a style perfectly simple and intelligible, so as to be easily sung. Simple and natural harmony is vastly better adapted to impress the heart, and promote devotional feeling, than the most highly wrought pieces of scientific skill. The most sublime and the most pathetic are always the most simple. Church Music should be like the Gospel, which commends itself by its simplicity and sublimity, equally to the learned and unlearned. A mere display of science is as much out of place in a psalm tune, as a display of oratory in prayer.

## PREFACE.

The variety of metres is very great. It is presumed that but very few Hymns are contained in the Hymn Books of the different religious denominations, for which a tune may not be found in the Choir.

In the first edition of the Choir it was the author's leading design to furnish a volume of new music; in this (the second) edition the plan has been so far changed as to include such old tunes as are in common use, and are truly valuable—by which the work will be rendered more full and satisfactory, as an entire and complete manual of Church Music. To make room for these it has been necessary to omit some tunes contained in the first edition, from which circumstance the present edition will be found to differ considerably from that. The whole work is now stereotyped, and while no pledge is given that alterations shall not be occasionally made, it is fully believed that no changes will be required so considerable as to render the use of successive editions together, inconvenient.

Finally, it is believed that the Choir will prove a highly practical work. Not one tune has been inserted, which it was not thought might occasionally prove useful; and there are very few which may not be easily and agreeably executed, without instrumental aid and support.

Where no particular directions are given, the following arrangement of the different parts has been followed, viz: the Base is placed upon the lowest staff. This part should always be sung by the lowest male voices.

The Tenor is placed upon the upper staff. This part should always be sung by the highest male voices.

The Alto, Counter Tenor, or Second Treble, is placed upon the staff next below the Tenor. This part should be performed by boys, before their voices change, or by the lowest female voices.

The Treble is placed upon the staff next above the Base. This part should always be sung by high female voices.

⚡ Editors and publishers of music are cautioned against republishing pieces from this work. With the exception of the few old tunes, the whole of the Choir (including the arrangements from European authors,) is claimed as property, and has been secured according to law.

### BOSTON ACADEMY OF MUSIC.

At a meeting of the Boston Academy of Music, August 9, 1833—A copy of "The Choir, or Union Collection of Church Music," having been previously examined, it was unanimously

*Resolved*, That the Government highly approve of said work, believing that the music has been selected and prepared with great care and judgment, that it embraces a sufficient variety of tunes well adapted to the purposes of instruction, and of public and private worship; and, that it is well calculated to improve the public taste, and elevate the standard of sacred music in the community.

GEO. WM. GORDON, *Secretary*.

### BOSTON HANDEL AND HAYDN SOCIETY.

BOSTON, OCTOBER 23, 1833

At a meeting of the Board of Trustees of the Handel and Haydn Society, it was unanimously

*Resolved*, That in the opinion of this Board, "The Choir, or Union Collection of Church Music," contains a very rich variety of Psalm and Hymn Tunes, and other pieces of music; many of which are in a style new, easy and highly pleasing. The Board regard this book as a valuable acquisition to the stock of Church Music, calculated to create an increased interest in Singing Choirs and Schools, and to promote the great object of Music in Public Worship.

EXAMPLE.

Direct.

18. What is a Shake or Trill?

It consists of a quick alternate reiteration of the note above, with that over which the character is placed, and usually ends with a turn from the note below.

EXAMPLE.

NOTE. The Shake is an ornament, both brilliant and elegant ; but it should have no place in Psalmody, or common Church Music

19. What is an Appoggiature?

A small note which takes its time from the note which immediately succeeds it. It always occurs on an accented part of a measure.

EXAMPLE.

20. What is an After Note?

A small note which takes its time from the note which immediately precedes it. It always occurs on an unaccented part of a measure.

EXAMPLE.

in various ways, no rule that is of infallible application can be given for their performance, which must vary according to the expression of the passage in which they occur. They are usually written in a smaller character than common notes, to show that they do not properly belong to the chord in which they appear ; by which means a visible breach of the laws of harmony is avoided.

21. What are Syncopated Notes?

Those which commence on an unaccented and are continued on an accented part of a measure.

EXAMPLE.

LESSON V. (a.)

OF SOLMIZATION.

i. What is Solmization?

It is the application of certain syllables to musical sounds.

NOTE. Appoggiatures and After Notes are not reckoned in making up the time of a measure ; but are deducted from the time of the Notes on which they depend. This, for the most part, is done in proportion to their own nominal value, with the exception that the Appoggiature receives double its nominal value when it precedes a pointed note. As the insertion of these Notes is a matter of taste, and as the best composers use them

## 2. Of what use is Solmization?

It enables the young performer to utter a sound with fulness and freedom, and assists him to secure a correct intonation.

It promotes a feeling or consciousness of the precise relation of the sounds in the octave to each other, and especially to the Tonic, or Key Note. By associating the several syllables with their corresponding sounds, this relation becomes familiar, and we acquire the habit of expressing any note with ease and certainty.

## 3. How many syllables are used in Solmization?

Seven; there being one for each sound.

## 4. What are they?

Do, Re, Mi, Fa, Sol, La, Si.

*Pronounced.*

Doe, Rae, Mee, Fa,\* Sole, La,\* See.

## 5. Which of these syllables governs the others, and fixes their places upon the Staff?—Si.

## 6. By what is the place of the syllable Si known?

By the Signature.

## 7. What is the Signature?

The Flats or Sharps placed at the beginning of a tune or strain.

## 8. What is the signature said to be, when there are neither flats or sharps at the beginning of a tune or strain?

Natural.

## 9. If the signature be natural, on what letter is the syllable Si?

On B.

10. If the signature be one flat, (B $\flat$ ) on what letter is the syllable Si?—On E.11. If the signature be two flats, (B and E $\flat$ ) on what letter is the syllable Si?

On A.

12. If the signature be three flats, (B, E, and A $\flat$ ) on what letter is the syllable Si?

On D.

\* The *a* in these syllables may be sounded as in Far, or as in Fail—at the discretion of the Teacher.

13. If the signature be four flats, (B, E, A and D $\flat$ ) on what letter is the syllable Si?

On G.

14. If the signature be one sharp, (F $\sharp$ ) on what letter is the syllable Si?

On F $\sharp$ .

15. If the signature be two sharps, (F and C $\sharp$ ) on what letter is the syllable Si?

On C $\sharp$ .

16. If the signature be three sharps, (F, C and G $\sharp$ ) on what letter is the syllable Si?

On G $\sharp$ .

17. If the signature be four sharps, (F, C, G and D $\sharp$ ) on what letter is the syllable Si?

On D $\sharp$ .

## 18. Having ascertained the place of the syllable Si by the signature, by what rule are the places of the other syllables known?

They follow upon each degree of the Staff, in regular order.

## 19. What is the order of the syllables ascending from Si?

Do, Re, Mi, Fa, Sol, La.

## 20. What is the order of the syllables descending from Si?

La, Sol, Fa, Mi, Re, Do.

## 21. What effect have accidentals on solmization?

When accidentals are used, it often becomes necessary to change the syllables, in order to sing in exact tune.

## 22. How are such changes to be made?

Sometimes by a different termination of the syllables, *Fe* for *Fa*, *Se* for *Sol*, &c.; and sometimes by considering the accidentals as occasional changes of the signature.

NOTE. The use of accidentals is so various, that it is impossible to give any rule which shall be applicable to all cases. A judicious teacher will be able to direct such changes as the nature of the different passages may require, and to assign the reasons for them.

NOTE. Other signs of Compound time, as  $\frac{9}{4}$ ,  $\frac{9}{8}$ ,  $\frac{9}{16}$ , &c. may be sometimes found; but they seldom occur in modern music.

36. What note is made the general standard of reckoning time?  
The Semibreve.

37. Why are figures employed as signs of time?  
To express the fractional parts of a Semibreve contained in a measure: as  $\frac{3}{4}$ , three crotchets, or three fourths of a Semibreve;  $\frac{3}{8}$ , three quavers, or three eighths of a Semibreve, &c.

38. What rest is used to fill a measure in all kinds of time?  
A Semibreve rest.

39. How may the habit of keeping time with accuracy be acquired?  
By the frequent and persevering practice of counting or beating while singing.

NOTE. On the subject of beating time, Dr. Arnold makes the following remark:—"I am by no means an advocate for the smallest motion or gesticulation, either with the hand, foot or head, when a performer once begins to perform with any degree of exactness; but at the commencement, it is absolutely necessary that the right hand should be taught to make the beats in every measure, till it becomes to the pupil what the pendulum is to the clock, which is to keep it regular and in exact motion."

## LESSON VII.

## OF THE DIATONIC SCALE AND THE MAJOR AND MINOR MODES.

1. What is the Diatonic Scale?  
A gradual succession of eight\* fixed sounds; proceeding by unequal degrees, or intervals, called Tones and Semitones.

Major and Minor.

\* The first of the seven primary sounds, being repeated to make out the eight notes, or to complete the octave.

7 What is the peculiar effect of each mode?

The Major Mode is bold and cheerful: the Minor Mode is pathetic and mournful.

8. What is the order of intervals in the Diatonic Scale, Major Mode?

From the Third to the Fourth sounds, [Mi to Fa]—and from the seventh to the eighth sounds [Si to Do] are semitones; the rest are whole tones.

9. What is the order of Intervals in the Diatonic Scale Minor Mode, ascending?

From the Second to the Third sounds [Si to Do]—and from the Seventh to the Eighth sounds [Sol to La] are semitones, the rest are whole tones.

10. What is the order of Intervals in the Diatonic Scale, Minor Mode, descending?

From the Fifth to the Sixth sounds [Mi to Fa] and from the Second to the Third sounds [Si to Do] are semitones, the rest are whole tones.

11. What is the difference between the Ascending and Descending scale, Minor Mode?

12. What characters are used to denote this change in the Minor Mode?

Sharps or Naturals are used\* as accidentals in ascending; and Naturals or Flats are used as accidentals in descending.

13. When are the Major and Minor Mode said to be relative?

When the Signature is the same—or, when they agree in Signature.

14. What is the relative Minor to any Major Key?

Its sixth above or its third below.

15. What is the relative Major to any Minor Key?

Its third above or its sixth below.

16. What interval is that which determines the Mode to be either Major or Minor.

The third.

17. What is the difference between the third in the Major mode, and the third in the Minor mode?

The Major third is one Semitone greater.

18. To what is the peculiar effect of each mode to be chiefly attributed?

To the third.

19. What is meant by the Key note?

The note with which the scale begins and ends.

20. What syllable is applied to the Key note in the Major mode?

Do. [F'a.]

21. What syllable is applied to the Key note in the Minor mode?

La.

\* On the Sixth and Seventh Degrees of the Scale.

22. When is the Diatonic scale said to be in its natural position?  
When it is formed without the aid of flats or sharps—or when the signature is natural.

23. On what letter does the Natural Diatonic scale commence—Major mode?—On C.

24. On what letter does the Natural Diatonic scale commence—Minor mode?—On A.

25. What is meant by the transposition of the scale?

The scale is said to be transposed when it commences on any other

letter than C in the Major mode; or on any other letter than A in the Minor mode.

26. In the transposition of the scale how is the relative situation of the semitones preserved?—By the use of Flats or Sharps

27. Into how many keys may the scale be transposed?

Twelve—each of which may be in the Major or Minor mode.

28. But if there are but seven primary sounds in music, how can these twelve keys be obtained?

By an artificial division of the Diatonic scale into Semitones.

## LESSON VIII.

*Of the peculiar qualities and relation of the several notes which compose the Diatonic scale, or, of the technical appellations applied to the several notes of the scale, descriptive of their peculiar character and relative situation.*

1. What is the first note of the Scale, or the Key note, called?  
The Tonic. [Do in the Major and La in the Minor mode.]
2. What is its peculiar character?  
It determines the pitch of the scale. It is the basis or foundation upon which all the other notes rest, and from which they are reckoned.
3. What is the second note of the scale called?  
The Supertonic. [Re in the Major and Si in the Minor mode.]
4. Why is it so called?  
Because of its situation; being the next above the Tonic.
5. What is the third note of the scale called?  
The Mediant. [Mi in the Major and Do in the Minor mode.]
6. Why is it so called?  
Because it is midway between the Tonic and Dominant.
7. What is peculiar to the Mediant?  
It forms in connexion with the Tonic the most important chord in harmony; and determines the nature of the mode.
8. What is the fourth note in the scale called?  
The Subdominant. [Fa in the Major and Re in the Minor mode.]
9. Why is it so called?  
Because it sustains the same relation to the Octave, which the Dominant sustains to the Tonic: being a fifth below the Octave, as the Dominant is a fifth above the Tonic.
10. What is the fifth note of the scale called?  
The Dominant. [Sol in the Major and Mi in the Minor mode.]
11. Why is it so called?  
Because of its importance in the scale, its constant occurrence, and its immediate connexion with the Tonic.

12. What is the sixth note of the scale called?  
The Submediant. [La in the Major and Fa in the Minor mode.]
13. Why is it so called?  
Because it is midway between the Subdominant and the Octave; or because it sustains the same relation to the Octave which the Mediant sustains to the Tonic.
14. What is the seventh note of the scale called?  
The subtonic, or leading note. [Si in the Major and Sol in the Minor mode.]
15. Why is it so called?  
Because it is only a Semitone below the Octave, and upon hearing it the ear naturally anticipates the Octave.
16. What is the eighth note of the scale called?  
When considered in relation to the first it is called the Octave
17. What is the difference between the Tonic and the Octave?  
The difference consists only in the pitch; the Octave is essentially the same, being but a repetition of the Tonic, eight notes higher.
18. How may the Tonic or Key Note be known?  
If the Signature be natural, C is the Tonic in the Major, and A in the Minor mode. If the Signature be formed by Sharps, the Tonic in the Major mode is always the first degree above the last Sharp of the Signature, and the Tonic in the Minor mode is always the first degree below the last sharp of the Signature. If the Signature be formed by Flats, the Tonic in the Major mode is always the third degree below the last flat of the signature, and the Tonic in the Minor mode is always the second degree above the last flat of the signature.
- The last note in the Base is usually the Tonic, though not necessarily so.
19. How may the Minor Tonic be known from its relative Major?  
By the leading note, which in the Minor mode is always formed by an accidental.

LESSON IX.

OF INTERVALS AND THEIR INVERSION.

1. What is meant by an Interval?  
The distance from one sound to another.
2. What is the smallest practicable interval?  
A Semitone.
3. How many intervals are found in the Diatonic Scale?  
Fourteen.
4. What are they called?

- Unison.
- Minor Second.
- Major Second.
- Minor Third.
- Major Third.
- Perfect Fourth.
- Sharp Fourth.
- Flat Fifth.
- Perfect Fifth.
- Minor Sixth.
- Major Sixth
- Minor Seventh.
- Major Seventh.
- Octave.

EXAMPLE.

UNISON. This cannot properly be called an Interval, although in composition it is considered and treated as such; as C, C.

MINOR SECOND; as from E to F, consisting of one semitone.

MAJOR SECOND; as from C to D, consisting of one tone.

MINOR THIRD; (called also the *flat third* or *lesser third*;) as from E to G, consisting of one tone and one semitone.

MAJOR THIRD; (called also *sharp third* or *greater third*;) as from C to E, consisting of two tones.

PERFECT FOURTH; as from D to G, consisting of two tones and one semitone.

SHARP FOURTH; (called also *Tritonus*;) as from F to B, consisting of three tones.

FLAT FIFTH; (called also *imperfect* or *false fifth*;) as from B to F, consisting of two tones and two semitones.

PERFECT FIFTH; as from C to G, consisting of three tones and one semitone.

MINOR SIXTH; as from E to C, consisting of three tones and two semitones.

MAJOR SIXTH; as from C to A, consisting of four tones and one semitone.

MINOR SEVENTH; (called also *flat seventh*;) as from D to C, consisting of four tones and two semitones.

MAJOR SEVENTH; (called also *sharp seventh*;) as from C to B, consisting of five tones and one semitone.

OCTAVE; as from C to C, consisting of five tones and two semitones.

5. What is meant by the Inversion of Intervals?

When the lowest note of an Interval is placed an Octave higher, or when the highest note of an Interval is placed an Octave lower, such change is called Inversion.

EXAMPLE.

By Inversion

6. Which of the Diatonic intervals are called Consonant?  
The Octave, Fifth, Perfect Fourth, Thirds and Sixths.
7. Which of the Diatonic intervals are called Dissonant?  
The Seconds, Sevenths, and Sharp Fourth.

LESSON X.

OF THE CHROMATIC SCALE, &C.

1. What is the Chromatic Scale?  
A scale proceeding by Semitones only.
2. How is the Chromatic Scale formed?  
By a Division of the Diatonic Scale into semitones; ascending by Sharps, and descending by Flats.
3. What syllable is used in singing this scale?  
Ah.

EXAMPLE.

4. How many distinct sounds are there in the Chromatic Scale?  
Twelve.

5. How may the Diatonic Scale be formed upon each of these as a Tonic or Key Note?

By the use of Sharps or Flats. (See Lesson vii. Ques. 28, and Ex. page xvii.)

OF CHROMATIC INTERVALS.

6. What are Chromatic Intervals?

Such Intervals as are derived from the Chromatic Scale.

7. What are they?

Extreme Sharp, or Superfluous, Unison; as }  
from C to C#. Ex. 

Extreme Sharp, or Superfluous, Second; as }  
from C to D#. Ex. 

Extreme Flat, or Diminished, Third; as from }  
D# to F. Ex. 

Extreme Flat, or Diminished, Fourth; as }  
from D# to G. Ex. 

Extreme Sharp, or Superfluous, Fifth; as }  
from C to G#. Ex. 

Extreme Flat, or Diminished, Sixth; as from }  
D# to Bb. Ex. 

Extreme Sharp, or Superfluous, Sixth; as from }  
Bb to G#. Ex. 

Extreme Flat, or Diminished, Seventh; as from }  
D# to C. Ex. 

Extreme Flat, or Diminished, Octave; as from }  
C# to C. Ex. 

NOTE. The Scale is also subdivided into smaller intervals called *Dieses*, or *Quarter Tones*, as from C# to Db; or from G# to Ab, &c. and thus divided, it is called the ENHARMONIC SCALE. These distinctions, however, although theoretically important, are of little practical utility; since upon keyed instruments, as the Organ, or Piano Forte, the extreme sharp second, is the same as the Minor Third; the extreme flat third is the same as the Major Second, &c. and the same key is used for C# and Db—G# and Ab, &c.

It is believed that, with the assistance of a judicious instructor, the foregoing principles will be sufficient for all the purposes of vocal performance. To such as wish to become acquainted with the Theory of Music, Callcott's Musical Grammar, Kollman's Essay on Musical Harmony, and Burrow's Thorough Base Primer, are recommended as the best works which have been published in this country.

1. Sweet the moments, rich in blessing, Which before the cross I spend; Life, and health, and peace possessing, From the sinner's dying Friend.

2. Love and grief my heart dividing, With my tears his feet I'll bathe; Constant still, in faith abiding, Life deriving from his death.

Truly blessed is this station, Low before the cross to lie; While I see divine compassion, Beaming in his gracious eye.

May I still enjoy this feeling, Still to my Redeemer go; Prove his words each day more healing, And himself more truly know.

I would not live away, no—welcome the tomb,  
Since Jesus has lain there, I dread not its gloom;  
There, sweet be my rest, till he bid me arise,  
To hail him in triumph descending the skies.

Who, who would live away, away from his God;  
Away from yon heaven, that blissful abode,  
Where the rivers of pleasure flow o'er the bright plains,  
And the noon-tide of glory eternally reigns:

Where the saints of all ages in harmony meet,  
Their Saviour and brethren, transported to greet;  
While the anthems of rapture unceasingly roll,  
And the smile of the Lord is the feast of the soul.

O'er the graves of those ye love;  
Far removed from pain and anguish,  
They are chanting hymns above.

\* This tune was written by a young lady, a pupil of the editor, who died on the 13th of July, 1833, aged 16 years. A short time before her death, and while yet in good health, she selected these words (Church Psalody, Hy. 676.) and composed the music for them. The family of the deceased, at the request of the editor, have kindly consented to its publication in the Choir.
